DETAILED ACTION

1. Currently, claims 41, 42, and 53 are pending and under consideration in this application. These claims were rejected in the prior action, mailed on August 10, 2004. In the Response filed on December 6, 2004, the Applicant amended claim 41, and added claim 53.

2. Claims 41, 42, and 53 are allowed.

Claim Rejections - 35 USC § 103

3. (Prior Rejections- Withdrawn) Claims 41 and 42 were rejected under 35 U.S.C. 103(a) as being unpatentable over Cerami et al., WO 99/44583 (of record in the June 2003 IDS), in view of the teachings of Sternick et al. (WO 85/03635- of record in the June 2003 IDS); or over Cerami et al., WO 99/44583 (of record in the June 2003 IDS), in view of the teachings of Li et al. (U.S. Patent 6,303,136). The claims have been amended to require that the fibers in the lumen of the device are crimped yarn fibers. As noted by the Applicant, neither of the previously cited references teaches the use of crimped yarns. The Applicant's arguments, in combination with the amendments to the claims are therefore found persuasive.

While the art teaches the use of materials comprising crimped yarns in biological devices, such devices lack an outer surface, and are for the purpose of vascular or other tissue grafts. See e.g., WO 91/19464, abstract. Because the art does not teach or suggest the use of crimped yarns in devices such as those claimed in the present application, or described in the Cerami, Li, or Sternick references, the rejection is withdrawn.
